Leveraging Strategies to Remove Impediments and Deliver Projects
SHRP2 C19 Background

- In October 2013, VTrans was selected as a recipient of the SHRP2 C19 grant.

C19 Desired Outcomes

- Evaluate risks to timely project delivery
- Identify opportunities to expediting projects with special emphasis on the strategies described in the *Expediting Project Delivery* report
- Identify resource demands for the ABP and how this may differ from conventional project delivery
- Analyze the VTrans organizational structure for opportunities for increased efficiencies
- Identify potential process improvements
- Build relationships with internal and external partners

Three Years of Proven Performance
ABP by the Numbers

- 22 projects have been delivered through 2014
- 6 are under construction this summer
- The 28 projects represent $55 million in construction costs
- Another 10 ABP projects will be delivered in 2017
Q8 The Stowe VT 108 Bridge Project used an innovative construction method called Accelerated Bridge Construction, which uses prefabricated bridge elements and road closures to reduce onsite construction time. Conventional construction typically uses temporary bridges and takes one to two years to complete. How satisfied were you with the Accelerated Bridge Construction?

Q9 How would you rate your level of satisfaction with the road closure compared to alternating one-way traffic following the bridge closure period?

Q12 Overall, how satisfied were you with how VTrans delivered this project?
