

The sole purpose of this design spreadsheet is to assist engineers in the analysis of the GRS-IBS. It is the responsibility of the user (i.e. experienced engineer) to determine the appropriateness and accuracy of input data and to review and verify the correctness of the computed results. FHWA does not assume any liabilities for any damages that may result from the use or misuse of this spreadsheet. Foundation settlement is not considered in this analysis and should be assessed separately. FHWA does not warrant that the spreadsheet is free from all bugs, errors, or omissions. This spreadsheet is provided "as is" without warranty or condition of any kind, either express or implied.
