The future of bridge design is here! Service Life Design is being looked at all across the country as the key to ensuring 100-year service life or longer for bridges.

In this free workshop:

- Learn critical decision-making processes that lead to longer-lasting bridges.
- Understand some of the tools and guidance you need to use service life design.
- Hear peers discuss their efforts to implement Service Life Design methods.
- Hear from an expert panel representing state bridge owners, designers, academia, and industry representatives.
